Background Family studies have shown a strong heritability component for venous thromboembolism (VTE), but established genetic risk factors are present in only half of VTE patients. Aim To identify genetic risk factors in two large families with unexplained hereditary VTE. Methods We performed whole exome sequencing in 10 affected relatives of two unrelated families with an unexplained ...

Department of Health | 8.1 AOD issues
Nowadays, more so than ever before, getting high doesn't have to involve a trip to the projects to ask a sketchy man on the sidewalk for drugs. It can be as simple as opening up the medicine cabinet and eating two or three pills. With medicine being abused so rampantly, I believe it is beneficial for parents and friends alike to be aware of what prescription drugs can be abused, and just what ...

Addictions Worksheets For Professionals And Self-Help ...
Substantial progress has been made in developing prevention programs for adolescent drug abuse. The most effective interventions target salient risk and protective factors at the individual, family, and/or community levels and are guided by relevant psychosocial theories regarding the etiology of substance use and abuse.
