Mass is both a property of a physical body and a measure of its resistance to acceleration (rate of change of velocity with respect to time) when a net force is applied. An object's mass also determines the strength of its gravitational attraction to other bodies.. The SI base unit of mass is the kilogram (kg). In physics, mass is not the same as weight, even though mass is often determined by ...

In Newtonian physics, free fall is any motion of a body where gravity is the only force acting upon it. In the context of general relativity, where gravitation is reduced to a space-time curvature, a body in free fall has no force acting on it.. An object in the technical sense of the term "free fall" may not necessarily be falling down in the usual sense of the term.
