occurrences of traffic congestions. Aided by the growing adoption of e-bicycles, the industry is expected to witness a further growth in the forecast period of 2021-2026, growing at a CAGR of 5.2%.

A Brief Introduction to Vehicle Dynamics

Vehicles for human transport that have two wheels and require balancing by the rider date back to the early 19th century. The first means of transport making use of two wheels arranged consecutively, and thus the archetype of the bicycle, was the German draisine dating back to 1817. The term bicycle was coined in France in the 1860s, and the descriptive title "penny
