Coolant is leaking v8-5.4l leaks 1998 ford expedition coo...

An unaddressed coolant leak will make it impossible to tell if the level in the reservoir is going down due to that leak or a leaking head gasket. The clue in this case is if coolant is leaking into an oil pan. If it is, the oil will turn brown. If it is not, the oil will stay clear. If the oil is brown and the coolant level is low, it is up and it will start to look like a chocolate milk shake.

1998 Ford Expedition Coolant Leak - dev.destinystatus.com

Ford Expedition owners have reported 3 problems related to coolant leaking (under the engine and engine cooling category). The most recently reported issues are listed below. Also please check out our analysis of Ford Expedition based on all problems reported for the Expedition.

Ford Expedition Coolant Leaking Problems

Coolant is going to become acidic over time. The corrosion inhibitors wear out in about two years. Coolant must be replaced at scheduled intervals to replenish those additives. Ask any GM owner about coolant. Check the heater cores and radiators. Those use the red Dex-Cool, (Dex-Mud) antifreeze.
