everyone, I've just bought a jet ski, 2002 SeaDoo GTX Di. It starts right up and seems to have no problem, but previous owner told me, it would start and run great right away, but as soon as you give it close to max

speed/rpm, it would like stall for a second, check engine light will come on, and it will continue to run on low rpm and you won't be able to pick speed up again.
