The Usual Signs of a Malfunctioning Audi A4 Oxygen Sensor. Your Audi A4's oxygen sensor is an essential part of the car because it determines the correct fuel-to-air ratio for the engine. However, it only has a limited service life particularly for older models, and it could lead to different problems once it malfunctions.

Our A4 oxygen sensors are designed for
your Audi computer's voltage requirements.
They deliver data from your exhaust output,
which tells your engine how much fuel to
intake at any given time. The right fit is
essential in order to properly adjust for
changes in temperature, altitude and engine
load.
