RC engine size or displacement is measured in cubic centimeters (cc) or cubic inches (ci). In terms of RC engines, displacement is the volume of space a piston travels through during a single stroke. A larger number, whether expressed in cubic centimeters or cubic inches, denotes a larger engine.

NGH GT25 25cc Two-Stroke Engine NGH-GT25 - Motion RC

Rated 4 out of 5 by Tross from New owner My new splitter did everything I hoped it would do. I bought it at home depot, all I had to do was add gasoline and pull the starter rope once and split over two cords of oak. It is time for me to change the engine oil and after I read both manuals I discovered that I have to turn the 500 pound Cub Cadet 25 ton log splitter on its side to drain the oil.
