of your lawnmower. But swapping in a 95 horsepower motorcycle engine makes it pure lunacy. And we love lunacy.

### **Citroën 2CV - Wikipedia**

The 2CV's engine has a combined engine 'breather' and oil filler assembly which contains a series of rubber reed valves. These allow positive pressure to escape the crankcase (to the engine air intake to be recirculated) but which close when the pressure in the crankcase drops as the pistons move apart. Because gases are expelled but not admitted this creates a slight vacuum in the crankcase so that any weak joint or failed seal causes air to be sucked in rather than allowing oil to leak out.
