I used this 3 phase brushless motor with the servo tester(STR-110) and the 18A RC motor controller (SC-118) to rotate a magnet assembly at a precise speed for a school project. It worked very well. The motor can operate from 13.5 volt PS or battery. With a light load it draws about 150 ma at 200 rpm and about 560 ma at 3600 rpm.

3 Phase DC motor control

Brushless DC motors typically have an efficiency of 85-90%, while brushed motors are usually only 75-80% efficient. Brushes eventually wear out, sometimes causing dangerous sparking, limiting the lifespan of a brushed motor. Brushless DC motors are quiet, lighter and have much longer lifespans. Because computers control the electrical current ...
