i agree with the answers that's been gave to you as long as its only smoking like that on start up, but id like to add that a 305 and 350 is not much difference in them, both engines can be rebuild or repaired and make very nasty engines, replacing the parts needed for ur issue is fine but the problem is getting a engine that's not already been rebuilt or too many times if u want to do a true ...

283 VS 305 What is better? - Chevy Message Forum ...

Generally a larger bore V8 engine with a good set of cylinder heads will rev higher on the rpm range than a similar displacement V8 with a smaller bore and longer stroke. On the surface the 305 (5.0 liter) V8 would seem to be an equal to its big competitor during the 1980s, the Ford 302 (5.0 liter V8).

Chevrolet small-block engine - Wikipedia

I have to ask... is the 305 so lame because they never changed the valve spacing? I just have a tough time believing that a pushrod V8 with a bore under 4 inches is all of a sudden an inferior product. There must be a logical reason that the Chevy 305 in particular was not a very good engine.
