The Mapbox Studio style editor is a tool for creating map styles. A style is a set of rules for how your map will be rendered on a page. It includes references to your data, map images (icons, markers, patterns), fonts, and, most importantly, it defines how all your data should be styled on your map.

3D computer graphics, sometimes called CGI, 3DCG or three-dimensional computer graphics (in contrast to 2D computer graphics), are graphics that use a three-dimensional representation of geometric data (often Cartesian) that is stored in the computer for the purposes of performing calculations and rendering 2D images. The resulting images may be stored for viewing later (possibly as an ...
