1987 Ford 302 Specs | It Still Runs

The third-generation Mustang was produced by Ford from 1978 until 1993. Being built on Ford's Fox platform, it is commonly referred to as the Fox-body Mustang. It evolved through a number of sub-models, trim levels, and drivetrain combinations during its production life. It underwent updates for 1987, and for a time seemed destined for replacement with a front-wheel drive platform.

Everything You Need To Know About 1979-1993 Foxbody Mustangs

The 1987 Mustang saw the last major redesign for the Fox Body Mustangs and included a completely overhauled exterior and the elimination of the V6 model, leaving just the GT with its 302cid V8 and the LX with its 2.3L inline four-cylinder engine.

87 Mustang Engine Rebuild

The engine was a weird blend of big block and small block mated to emission style heads. As installed, think of them as gasoline engines that believed they were diesels. Because there were a lot of 429 and 460 engines to be had back in the day, no one paid any attention to the 400 until recently.
