A Field Guide To Bacteria

Although some bacteria can swarm over nearly any agar surface, most swarming bacteria require soft agar in a narrow range of agar concentrations. Media solidified with agar concentrations above 0.3% exclude swimming motility and force the bacteria to move, if possible, over the surface whereas agar concentrations above 1% prohibit swarming of many bacterial species.

It was written as a "field guide," but it could easily serve as a popular introduction to microbiology. It would serve this latter purpose far better than, say, A Very Short Introduction to Microbiology, a book I do not recommend. Half of Dyer's book is dedicated to finding evidence of bacteria in the macroscopic world (for example, by ...
