Answer:In string theory there is no coupling that is independent of the string coupling  $g$ , so introducing a coupling with some different label in (15.3) could give a wrong impression. Any coupling that you may introduce in (15.3) is compatible with (15.4), where the second term has no coupling.

Course Description. This course introduces string theory to undergraduate and is based upon Prof. Zwiebach's textbook entitled A First Course in String Theory. Since string theory is quantum mechanics of a relativistic string, the foundations of the subject can be explained to students exposed to both special relativity and basic quantum mechanics.

### A First Course in String Theory Second Edition

• String theory does not have adjustable dimensionless parameters. • The dimensionality of spacetime is fixed. • There are two kinds of strings: open strings and closed strings. • The graviton appears as a vibrational mode of closed strings.
