A Manual of Underground Surveying - Loyal Wingate Trumbull ...

The open pit survey environment is very different to the shaft sinking environment and the skills, thus compounding the scarcity. The secure survey control network for the open pit becomes redundant for the underground operations once new beacons are established for the project. The survey control needed for the shafts and associated

Full text of "A manual of underground surveying"

Underground surveying is quite different from surveying on the surface. In tunnelling or mining operations it may be hot, wet, dark, cramped, dusty, dirty and dangerous, and usually most of these. The essential problem in underground surveying is that of orientating the underground surveys to the surface surveys, the procedure involved being termed a correlation .
