A Guide to Programming in Java is written for a one-term or two-term course. No previous programming experience is required or assumed. It is our goal that this text provide students the best possible introduction to programming using Java and to prepare them for further study in the IT/programming/computer science field. Preface

The Java™ Tutorials

First, many programmers are familiar with the C/C++ syntax. This makes it easy for a C/C++ programmer to learn Java and, conversely, for a Java programmer to learn C/C++. Second, Java's designers did not "reinvent the wheel." Instead, they further refined an already highly successful programming paradigm.
