alarm went off and could not be controlled, so I've taken out the fuse. I understand that the fault lies with the back-up battery failing in the main Accenta unit - the system was installed in 1999 and the battery has not been serviced. It's quite a large lead-acid battery I see they are on ebay for about 8.

The manual I was working from is different to the one linked to above, but I think the PCB may have been replaced so actually the manual in the link is possibly the right one (e.g. originally you pressed 9 to change the engineers code, now you press 4) Anyway, all done I think. Thanks for the help and support.
