50 Study Guide for An Introduction to  
Chemistry Section Goals and Introductions  
Section 5.1 Acids Goals To describe acids To  
make the distinction between strong and weak  
acids. To show the changes that take place on  
the particle level when acids dissolve in  
water. To show how you can recognize strong  
and weak acids. This section introduces one  
way to define acids, called the Arrhenius  
definition.

Chapter 18 acids and bases study guide

Flashcards | Quizlet

Acids and bases do not require much math at the organic chemistry level. Instead you will be required to understand what makes a strong acid or weak conjugate base. Your goal is to understand the nature of acidity and basicity so that you can comfortably rank the strong and weak molecules based on structure and conjugates.
