Saint Anthony Hospital - Job Search - symplr

Extracellular vesicles (EVs) are lipid bilayer-delimited particles that are naturally released from almost all types of cell and, unlike a cell, cannot replicate. EVs range in diameter from near the size of the smallest physically possible unilamellar liposome (around 20-30 nanometers) to as large as 10 microns or more, although the vast majority of EVs are smaller than 200 nm.
