progressive power curve that increases all the way to redline without
the typical 'spiking' or 'surging' associated with turbochargers. This

of the problems running a k20a2 in a 2006 rsx type s. Motor trans ecu
and engine wiring harness are all out of a 03 type s. The main problem
was that my speedo was acting like the tach but that was because of
connector "e" on the ecu.
