This is a question to those who have or know about Volvo D12 engines. Specifically, it's about adjusting the tappets/valve clearances . We have 2x D12 EVC motors (2004). Volvo manual says adjust valve/tappet clearances at the 200hrs first service, then every 800hrs. Sounds sensible. But elsewhere in the manual it includes adjusting the valves/tappets in a list of things to be done every 12months.
