Communiqué - American Association of Endodontists

x Recurrent oral erythema multiforme (ROEM) is now accepted as a less-recognized sub-type of erythema multiforme (EM). The diagnosis is based on the exclusion of other similar diseases, typical clinical features such as recurrent irregular painful erosions of oral mucosa without skin lesions and frequently evidence of past herpes simplex virus infection.

K3 is a third-generation, triple-fluted, asymmetric endodontic file system. Positive rake angle provides the active cutting action of the K3 endo files. The K3 rotary file's wide radial land provides blade support while adding peripheral strength to resist torsional and rotary stresses. The third radial land on K3 files stabilizes and keeps the instrument centered in the canal
