## **Agroforestry In Europe Current Status**

While recent EU Rural Development policy clearly recognises the economic, ecological, and social advantages of agroforestry systems, to date the implementation of such systems remains poor throughout most of Europe. In light of this, this collection of peer-reviewed papers brings together some of the most important current research in European agroforestry, and evaluates the current scope and future potential of agroforestry across the EU.

In Europe, agroforestry 12 has become virtually extinct, existing merely in small regions (Eichhorn et al., 2006, Mosquera-Losada et al., 2012). In less developed regions of Africa, Asia and Latin America, intercropping and agroforestry practices are still reported to be applied widely, playing an important role in agricultural production ( Li et al., 2013 , Vandermeer, 1989 , Windle, 1988 ).

A chestnut orchard is an open stand of grafted chestnut (*selva castanile*) trees for fruit production. In this agroforestry system, trees are usually intercropped with cereals, hay or pasture. These orchards are traditional systems in Canton of Ticino (Switzerland) and Northern Italy, where they are called "selva castanile". Similar systems can also be found in the Mediterranean region, for ...
