Following the creation of the project work group, AIAG solicited additional industry feedback - specifically from Tier 2 and lower companies - via a Voice of the Customer survey, which showed a strong international interest in replacing the previous Core Tools "spreadsheets on CD" product with a cloud-based application.

IATF 16949 Five core tools - What are they?

What are Core Tools? Quality Core Tools are a group of problem solving skills the AIAG requires to evaluate and improve your Quality Management System (QMS). There are many statistical tools used to solve problems, but the AIAG has determined that the five tools below are a core requirement for evaluating your QMS. If your company is seeking certification to IATF 16949, your Internal Auditors will need to be competent (and prove it) in these core tools in order to meet the requirements.
