Air Engine: Inspire the next generation of engineers, challenge their ability and push the boundaries of what they thought a 13year old can make and challenge what you think a teacher can teach! This is a project I run in my after school engineering club, no...

Air Engine Wooden

Air engine 2 I had previously built a reciprocating air engine out of wood back in 1985, and posted it here in 2007.. I received a number of enquiries for plans for that engine, but the design for that air engine wasn't really one that lent itself to building from plans.

DIY plans wooden air engine Plans PDF Download

Air motor from UGEARS is a small but exact analogue of steam engines. You need just to blow into a special socket or an ordinary balloon and air motor will start working. This model is unusual because is made entirely of wood materials. This mechanism has an air tachometer and two boxes for details.
