CM Kejriwal slams Centre for not finding solution to air pollution in ...

Indoor pollution sources that release gases or particles into the air are the primary cause of indoor air quality problems. Inadequate ventilation can increase indoor pollutant levels by not bringing in enough outdoor air to dilute emissions from indoor sources and by not carrying indoor air pollutants out of the area.

Introduction to Indoor Air Quality | US EPA

Water pollution (or aquatic pollution) is the contamination of water bodies, usually as a result of human activities, so that it negatively affects its uses.: 6 Water bodies include lakes, rivers, oceans, aquifers, reservoirs and groundwater. Water pollution results when contaminants are introduced into these water bodies. Water pollution can be attributed to one of four sources: sewage ...

Simple Solutions to Help Reduce Air Pollution

The map's color key is based on the categories of the Air Quality Index (AQI) (see Patient Exposure and the Air Quality Index). All orange, red, and purple areas exceeded the 8-hour ambient air quality standard for ozone during 2009. The map illustrates how likely it may be for a particular area to experience air quality advisories for ozone.
