While other dryers use a manual valve for purge control, Airtek provides a Purge Flow Regulator. Due to system pressure fluctuation, dryers equipped with manual purge valves waste air and energy by over-purging when system pressure is high and sacrifice performance by under-purging when system pressure is low.

User manual - Parker Hannifin  
Parker Airtek TW Series Heatless Desiccant Air Dryers remove water vapor from compressed air through a process known as Pressure Swing Adsorption. A pressure dew point of -40 ° F (-40 ° C) is attained by directing the flow of saturated compressed air over a bed of desiccant. The most commonly used desiccant is activated alumina, a spherical
