Algebra exponents lessons with lots of worked examples and practice problems. Very easy to understand! Prealgebra exponent lessons, examples and practice problems

### Simplifying Expressions with Exponents (examples ...

I suggest you read Fractional Exponents first, or this may not make sense. Anyway, the important idea is that:  $x^{1/n}$  = The n-th Root of x. And so a fractional exponent like  $4^{3/2}$  is really saying to do a cube (3) and a square root (1/2), in any order. Just remember from fractions that  $m/n = m \times (1/n)$ :
