$3(a+b)$ means to multiply 3 by $(a+b)$ Here is an example of expanding, using variables a , b and c instead of numbers: And here is another example involving some numbers.

Algebra - Expanding - Math is Fun

The expression $9 + 8$ represents a single number (17). This expression is a numerical expression, (also called an arithmetic expression). The expression $9 + x$ represents a value that can change. If x is 2, then the expression $9 + x$ has a value of 11. If x is 6, then the expression has a value of 15. So $9 + x$ is an algebraic expression. In the next few examples, we will be working solely with ...
