Aluminium Alloy En Aw 6063
6061 (Unified Numbering System (UNS)
designation A96061) is a precipitation-
hardened aluminium alloy, containing
magnesium and silicon as its major alloying
elements. Originally called "Alloy 61S", it
was developed in 1935. It has good mechanical
properties, exhibits good weldability, and is
very commonly extruded (second in popularity
only to 6063). It is one of the most common
alloys of ...
