of AM-PAC™ to all eligible members; and (3) tracking of supports provided to individuals transitioning

out of nursing facilities and any barriers they faced during and following the transition. CareSource plans to measure outcomes, including nursing facility length of stay and readmissions as well as inpatient admissions.

Increasing patient mobility through an individualized goal ...

Two AM-PAC versions are currently available: Paper-and-pencil Short forms for designed for inpatient and outpatient settings The items in the different short forms are drawn from the same AM-PAC item banks so that the standardized scores for specific functional domains (i.e., basic mobility, daily activity and applied cognitive) can be compared across all versions of the AM-PAC instruments.

Uniform Patient Assessment for Post-Acute Care

AM-PAC scores have not been evaluated in the acute care setting for predicting rehabilitation outcomes and successful discharges to home. This study will look at the predictive ability of AM-PAC scores on discharge outcomes from acute rehabilitation. In addition, the implementation of the AM-PAC scores as a
