American Heart Association CPR Guidelines Development ...

The American Heart Association (AHA) issued interim cardiopulmonary resuscitation (CPR) guidelines that apply during the COVID-19 pandemic. The AHA recommended bystanders and lay rescuers administer “hands only” CPR without mouth-to-mouth ventilation to limit exposures to the SARS-CoV-2 virus that causes COVID-19. Those administering CPR as first aid also should consider covering their own ...

**FREE* 2020 CPR, BLS, ACLS, PALS, Study Guide & Practice Tests*

Updated resuscitation guidelines refine how fast and how deep chest compressions should be during CPR - although it's unlikely that a non-professional rescuer will notice. The new rate of chest compressions is 100 to 120 compressions, or pushes, per minute, compared to “at least 100” in previous guidelines, according to the American Heart Association.

American Heart Association CPR & First Aid

The steps for CPR have not changed since 1954 when it was first introduced by Dr. Peter Safar. The order of the different steps for performing CPR has always been A-B-C, which represents the order airway, breathing, and compressions. This was the accepted best practice up until 2010 when the American Heart Association made revisions to the order of the steps.
