I have read most or all of the threads on TB having to do with the V6B cabinet and folks often suggest they came with CTS or Eminence speakers or alternately Altec 421A's or EV's.

Online Library Ampeg V6b User Guide

According to the Ampeg book, this cab only ever came with Eminence drivers so maybe people are confusing the speaker options with the B25B and/or the V4B.

restored it to original condition. It sounds great! Very loud and punchy. I'm using it at home when I practice.
