The goal of clinical research is to develop generalizable knowledge that improves human health or increases understanding of human biology. People who participate in clinical research make it possible to secure that knowledge. The path to finding out if a new drug or treatment is safe or effective, for example, is to test it on patient volunteers.

Molecular Biology (Stanford Encyclopedia of Philosophy)

Scientific evidence is objective. Scientific evidence is not, "it feels hot today". It is "it is exactly 102.6 degrees Fahrenheit at 3:30PM, 10% cloud cover." When evidence is observed in science, whether observations in the field or in the lab, measurements are taken using devices that are not subject to personal bias.
