The experiments will provide seminal answers to questions that are central to the prospects for fusion." Significant fusion power has only ever been achieved in two devices—and only for a little less than one second: up to 10 MW in the Tokamak Fusion Test Reactor (US), and up to 16 MW in the Joint European Torus (UK).

'Fusioneers' unite in Denmark

The structural heart disease team is internationally recognised and coordinates the largest transcatheter valve meeting in the world. We have pioneered many new technologies in this field and were the first centre in the world to perform transcatheter mitral valve replacements and to offer parachute device implantations to patients with heart ...

Our planned two-week investigation into the psychology of prison life had to be ended after only six days because of what the situation was doing to the college students who participated. In only a few days, our guards became sadistic and our prisoners became depressed and showed signs of extreme stress.
