GED Math Part 12 - Volume & Surface Area of Rectangular Prisms, Spheres, Cones, Triangular Pyramids - Duration: 1:46:31. The Organic Chemistry Tutor 8,553 views 1:46:31

LESSON Practice B Volume of Pyramids and Cones
Students also learn that the formula for the volume of a cube is side length cubed, and the formula for the volume of a pyramid is 1/3 times the area of the base times the height of the pyramid.

Volume and surface area of spheres, pyramids, cones and ...
A square pyramid has a height 18 cm and a base that measures 12 cm on each side. Explain whether tripling the height would triple the volume of the pyramid. The volume of the original pyramid is 864 cm³. The volume of the new pyramid is 2592 cm³. Therefore, if the height of the pyramid were tripled, its volume would be tripled.

Volume of Prisms, Cones, Pyramids & Spheres (H)
What did we learn about the volume of pyramids as related to the volume of prisms? If necessary, I may even ask for students to tell me the volume of a prism having the same base and height. Question #8 requires students to reason abstractly (MP2). They must be able to work with dimensions in variable form to answer the question.
