AP Biology - Collea's Corner  
Evidence for evolution comes from comparative anatomy (homologous and analogous structures), biogeography, embryology, the fossil record, biological classification, and molecular biology (relatives share DNA). 4. Biological species concept: A species is a reproductively isolated population able to interbreed and produce fertile offspring. 5.

Biology Study Guides - SparkNotes  
A major difference between an Advanced Placement Program (AP) biology course and a regular high school biology course is the emphasis on detail. One of the areas of concentration that could appear on an AP biology exam is evolution and related processes, such as mutation, natural selection, and genetic drift.

ap biology study guide evolution Flashcards and Study Sets ...  
Examples of natural selection provide evidence of evolution (pp. 437-438, FIGURES 22.12, 22.13) Natural selection and the adaptive evolution it causes are observable phenomena. Other evidence of evolution pervades biology (pp. 438-441, FIGURES 22.14-22.17) Evolution is validated by evidence from homologies, similarities between species that are due to common ancestry.
