Smart-UPS UPS Operation Manual - Schneider Electric

Patented green operating mode achieves efficiencies over 97%. Smart-ups was the first network UPS to be Energy Star certified. Intelligent battery management, pioneered by APC, maximizes battery performance and life through intelligent, precision temperature compensated charging.

APCUPSD User Manual

A runtime calibration is required at initial start-up, when additional batteries are added, old batteries are replaced or if the estimated runtime is found to be inaccurate. Do not use old batteries (two or more years old), and new batteries together. Refer to the Perform a UPS Runtime Calibration section in this manual for calibration criteria.

How do I perform a Battery Calibration on my Smart-UPS?

Follow these steps to do a proper manual calibration on your APC UPS: 1. Battery must be at 100% capacity when the Runtime Calibration is initiated/started. (charge the UPS for 24hours prior)

Apc Ups Calibration Manual

During normal operation, your Smart-UPS will display an estimated runtime via the software, network management card, or LCD screen. This runtime will vary depending on the load attached, the battery charge, and the age of the batteries. Performing a calibration forces the UPS on battery, drains the battery down, and charges it back up.
