App Engine Trace Flags

Hosting your static site on App Engine can cost less than using a traditional hosting provider, as App Engine provides a free tier. Sites hosted on App Engine are hosted on the REGION_ID.r.appspot.com subdomain, such as [my-project-id].uc.r.appspot.com. After you deploy your site, you can map your own domain name to your App Engine-hosted website.

Hosting a static website on Google App Engine - Google Cloud

App Engine locations. App Engine is regional, which means the infrastructure that runs your apps is located in a specific region, and Google manages it so that it is available redundantly across all of the zones within that region.. Meeting your latency, availability, or durability requirements are primary factors for selecting the region where your apps are run.
