The Apple Studio Display is a series of non-widescreen LCD and CRT displays manufactured and sold by Apple Computer, Inc. and introduced in 1998. After the 1999 introduction of the widescreen Apple Cinema Display, the Apple Studio Display line ran concurrently until it was discontinued in 2004. With the exception of the last model, the 5:4 17" Apple Studio Display, all Apple Studio Displays had ...

Apple Studio Display - Wikipedia

The Apple Studio Display series, originally launched as a single flat-panel LCD model, later included both flat-panel LCD models and traditional CRT models. To reduce confusion, EveryMac.com specifies whether these models are LCD or CRT-based in the name of the display.

It is the same for all Apple ADC Displays, as it is primarily a passive device, passing through the USB and DVI signals and providing power for the ADC display. DV Warehouse has them for \$188. I have used the 15" Studio LCD/ADC, the 17" Studio (the one you have) ADC, and a 20" Cinema ADC display all with the same DVI-ADC adapter.

Question: Q: What adapter do I need to use my Apple Studio ...
The Apple Studio Display (LCD), introduced with the non-color matched Power Macintosh G3/300 DT and Power Macintosh G3/300 MT, features a 15.1" viewable area active-matrix LCD display perched upon a dark blue adjustable stand with integrated ADB and S-Video in ports. Although sales were modest, this display initiated the transition from CRT-based to LCD-based displays.
