Injection molding machines - ARBURG

Hi, having a problem with Arburg 420V 1000-350. Machine was powered off and will not inject now. Mould closes, carriage comes in, nozzle is in location. But when machine switches to injection we get time out alarm. Have checked plugs for 24v and that solenoids energise, all ok. Neither injection unit will inject. Can purge in manual on both injection units.

Arburg problem - InjectionMoldingOnline.com

I have recently started a job where I must oversee and support production for an injection molding machine (specifically and Arburg 275 V 100 Horizontally Configured). Our company has only had this machine for less than a year, so no one here really understands the machine, and we only have support from some techs at some of our other plants. I have done my best really focusing on root causes ...
