The Science and Values Debate. The current consensus concerning the social responsibilities of scientists stands in sharp contrast to the opinion that prevailed several decades ago, which held that the primary responsibility of the investigator is to conduct research, and that policymakers, scholars, and the public should deal with the consequences of new knowledge (Resnik 1998, Pielke 2007).

Weird Science: Salt is Essential to Life | manoa.hawaii ...

Probably the most persuasive argument for the existence of God -- I don't mean to philosophers and logicians, but to ordinary people -- goes something like this: All of this -- that is, a world with beauty, humans, morality, etc., -- couldn't have come about by accident. It must be due to some intelligent, powerful Being -- and that's what God is.
