Balancing Chemical Equations Worksheet 1 Answer Key

...

Every balanced chemical equation consists of two parts: the reactant side and the product side. Both of these sides are separated by the means of an arrow. On the left side of the arrow, you will find the reactant side. This side represents the elements which are used for initiating the experiment.

Balancing Chemical Equations - AP Chemistry

When you find difficulty in balancing the equation in the balancing chemical equations worksheet, you can miss it with a fraction of $\frac{1}{2}$ and that will easily balance the equation. But the problem is that you cannot have a fraction for the co-efficient, this is why doubling all coefficients will help you balance the equation.
