Bioinformatics: Managing Scientific Data – Textbook House

Bioinformatics: Managing Scientific Data outlines these challenges and then explores - in exacting detail - how they've been met by eight data-integration systems devised by life scientists working in a wide range of fields. This is critical, hard-to-find information for a necessarily diverse audience: life science researchers with a hands-on role in analysis of their data, computer scientists working with biodata, and managers who want a better understanding of the processes they oversee.

5 Data Management and Bioinformatics Challenges of Metagenomics Metagenomics studies are data-rich, rich both in the sheer amount of data and rich in complexity. Biologists now have over two decades of experience in handling and analyzing DNA sequence data, but these are mostly data on reasonably well understood structures—genes and complete genomes.
