Throughout the COVID-19 pandemic, epidemiologists have monitored the evolution of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) with particular focus on the spike protein. An early variant with an aspartic acid (D) to glycine (G) mutation at position 614, D614G, rapidly became dominant and is maintained in current variants of concern. Zhang et al. investigated the structural ...

Science and technology studies (STS) focuses on the relationship between science, policy and practice, for example in conservation. STS examines how social, political, and cultural values shape scientific research and the co-evolutionary interactions between knowledge, expertise and socio-political change.

Biology - 2e - Open Textbook Library
The topic of scientific revolutions has been philosophically important since Thomas Kuhn's account in *The Structure of Scientific Revolutions* (1962, 1970). Kuhn's death in 1996 and the fiftieth anniversary of *Structure* in 2012 have renewed attention to the issues raised by his work. It is controversial whether or not there have been any revolutions in the strictly Kuhnian sense.

Scientific Revolutions (Stanford Encyclopedia of Philosophy)
The biological bases of fear and anxiety are now recognized, and the major brain structures and neuronal circuits involved in emotional information processing and behavior are delineated. Emotional and cognitive processes cannot be dissociated, even when considering such a basic emotion as fear.

Modern theories of human evolution foreshadowed ... - Science
Several behaviors that exert a strong influence on health are reviewed in this section: tobacco use, alcohol consumption, physical activity and diet, sexual practices, and disease screening. Although epidemiologic data on the relationships between these behaviors and various health outcomes were available in the early 1980s, many refinements in knowledge have occurred since then.

Biological Science By Freeman 2nd
Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations.Another major theme is evolution, which explains the unity and diversity of life.

The biology of fear- and anxiety-related behaviors
Charles Darwin's *The Descent of Man* was published in 1871. Ever since, it has been the foundation stone of human evolutionary studies. Richerson et al. reviewed how modern studies of human biological and cultural evolution reflect the ideas in Darwin's work. They emphasize how cooperation, social learning, and cumulative culture in the ancestors of modern humans were key to our evolution and ...
