In biology, polymorphism is the occurrence of two or more clearly different morphs or forms, also referred to as alternative phenotypes, in the population of a species. To be classified as such, morphs must occupy the same habitat at the same time and belong to a panmictic population (one with random mating).. Put simply, polymorphism is when there are two or more possibilities of a trait on a ...

In biology, taxonomy (from Ancient Greek *τάξις* (*táxis*) 'arrangement', and *-νομία* (*-nomía*) 'method') is the scientific study of naming, defining (circumscribing) and classifying groups of biological organisms based on shared characteristics. Organisms are grouped into taxa (singular: taxon) and these groups are given a taxonomic rank; groups of a given rank can be aggregated to form a more ...

Most Biology majors complete the standard track and continue onto a fourth semester of chemistry (CH 204 or 214), which is a requirement for medical and other professional schools. Students intending to apply to medical school are also advised to take biochemistry (CAS BI 421/422 or CH 373) in their junior or senior year.
