Abiotic and biotic Factors - Meaning, Examples & Differences - BYJUS

Death is the irreversible cessation of all biological functions that sustain an organism. For organisms with a brain, death can also be defined as the irreversible cessation of functioning of the whole brain, including brainstem, and brain death is sometimes used as a legal definition of death. The remains of a former organism normally begin to decompose shortly after death.

1st PUC Biology Question Bank with Answers Karnataka

Rademacher et al. show that the serine protease Esp from the abundant skin commensal *Staphylococcus epidermidis* processes pro-IL-1 $\beta$  to mature, biologically active IL-1 $\beta$  produced by epidermal keratinocytes in the absence of host canonical processing by the inflammasome and caspase-1. This observation highlights a mechanism by which a skin commensal positively contributes to cutaneous host ...

Hydrogen is the first element in the periodic table and has the atomic number one. Those elements which have the same atomic number but a different mass number are called isotopes. There are three isotopes of hydrogen namely, protium 1 1 H, deuterium 2 1 H or D and lastly tritium 3 1 H or T. The isotopes are different because of the different number of neutrons present in them.
