5.L.2.1 Compare the characteristics of several common ecosystems, including estuaries and salt marshes, oceans, lakes, and ponds, forests, and grasslands 5.L.2.2 Classify the organisms within an ecosystem according to the function they serve: producers, consumers, or decomposers (biotic factors).

5th Grade Science - Ecosystems Assessment
However, they are there. Ecosystems are smaller than biomes. They are a community of plants and animals that live in an environment. 3 There are many biomes on Earth. However, we will only talk about four. They are forests, grasslands, deserts, and tundras. The animals and plants in these biomes need to adapt to the environment.

Ecosystems - 5TH GRADE SCIENCE

A biome is made of many similar ecosystems.
Ecosystems are the interactions between the
living things and the nonliving things in a
place. In an ecosystem, the plants, animals,
and other organisms rely on each other and on
the physical environment – the soil, water,
and nutrients, for example. An ecosystem is
often much smaller than a biome, although the
size varies. 2 At any given time ...
