? 2000 BMW 328i - Replacing The Fuel Injectors

To remove an injector, you have to disconnect the electrical connectors to all the injectors. Then remove the fuel rail with all injectors attached to it. Individual injectors are then separated from the fuel rail, as needed. If you remove the fuel injectors for any reason (for example, to replace the intake manifold) and you plan to reuse the fuel injectors, replace all the fuel injector sealing O-rings.
