BMW single-cam M10, M20, and M30 engines need properly formulated oils. Newer oils often lack enough of the ZDDP (Zinc dialkyldithiophosphate) our older engines need. The reasoning for reducing, or sometimes even removing ZDDP, is that by removing it expensive modern catalytic converters, and O2 sensors, would last a bit longer.

[Bmw M10 Engine](#)  
The BMW M10 is an SOHC four-cylinder petrol engine which was produced from 1962-1988. It was BMW's first four-cylinder engine since the BMW 309 ended production in 1936 and was introduced in the New Class sedans.. Over 3.5 million M10 engines were produced during the M10's 26 year production run, and it was used in many BMW models.

[Classic BMW Engines | M30 | M20 | M10](#)  
The M10 engine as seen under the bonnet of an E30 is the culmination of a design that goes all the way back to 1961. Its conception began when engineering and racing hero Baron Alex von Falkenhausen was asked to design a small-displacement 1.3 litre engine for BMW's new line-up.
